ABOUT ME

B.Tech Computer Science student at VIT Bhopal with good command in problem solving. Proficient in building innovative projects, and leading technical workshops through the Microsoft Club. Skilled in leveraging modern technologies like cloud platforms, with a strong focus on delivering responsive, high-quality solutions.

EDUCATION

- VIT University, Bhopal** Oct 2022 – Oct 2026
Bachelor of technology in Computer Science and Engineering (Core) **CGPA: 8.45**
- Kendriya Vidyalaya Raiganj** April 2021 - May 2022
Higher Secondary (Class XII) **82.80%**
- Kendriya Vidyalaya Raiganj** April 2019 - May 2020
Secondary (Class X) **91.80%**

TECHNICAL SKILLS

- Programming Languages:** Python, Java, HTML5, C/C++, SQL
- Core Competencies:** Computer Networks, Data Structures, Algorithms, Software Development, Operating Systems
- Tools & Platforms:** AWS, Git, GitHub, MS Excel, Canva

PROJECTS AND EXPERIENCE

Harvest Hub - AI-Powered Agricultural Platform

- Developed AI-powered agricultural platform frontend with Next.js, supporting 500+ users and optimizing crop selection for 200+ farms
- Built ML-based plant disease detection system using TensorFlow, achieving 92% accuracy and reducing crop loss assessment time by 60%
- Deployed scalable backend on AWS EC2 with MySQL for crop and user data management, ensuring 99.7% uptime
- Integrated RESTful APIs for real-time data processing, improving farm decision-making efficiency by 35%
- Technologies:** Next.js, TensorFlow, AWS EC2, MySQL, Node.js, RESTful APIs, Git

Phishing Site Detector - Team Lead

Team Project

- Led a 5-member team to develop a Python-based phishing detection tool using scikit-learn and URL parsing, achieving 90% accuracy for 100+ users
- Designed machine learning model with MySQL integration for URL feature storage, reducing false positives by 30% and enabling real-time detection
- Built user-friendly HTML/CSS interface hosted on AWS EC2, improving user adoption by 35% through seamless URL input and result visualization
- Configured GitHub Actions for CI/CD, reducing deployment time by 25%
- Technologies:** Python, scikit-learn, HTML/CSS, AWS EC2, MySQL, GitHub Actions

Sign Language Converter

- Created Python-based computer vision application using OpenCV and TensorFlow, achieving 88% real-time accuracy for sign-to-text conversion
- Designed bidirectional translation system with MySQL backend for storing translation data, improving communication efficiency by 45% for deaf users
- Deployed application on AWS EC2 with optimized Docker containers, reducing resource usage by 20%
- Technologies:** Python, OpenCV, TensorFlow, AWS EC2, MySQL, Docker, Git

CERTIFICATIONS

- Cloud Computing - NPTEL**
- Cyber Security Analyst & GEN AI Using IBM Watsonx - IBM**

ACHIEVEMENTS

- ZS Campus Beats 2025 Contribution:** Collaborated in a college hackathon with a team of four, leveraging skills in MySQL and DSA to develop innovative solutions.
- Data Structures and Algorithms:** Tackled over 200 problems on LeetCode and GFG.

LANGUAGES AND INTERESTS

Languages: English | Hindi | Bengali

Hobbies: Football | Volleyball | Gaming
